

# Time management Setup

How to setup time management.

The screenshot shows the Elhatri Tournament Pro 1.3.1 interface. The main window displays a 'Category List' table with columns: Ref.nr., Nr., Description, Hour, Minits, Field, Match duration, Setup time, Sequence, and System. An 'Edit Category' dialog box is open, showing fields for 'Nr' (65), 'Description' (Gemengd 18-99yr wit - oranje (Cat.7 - 8)), 'Field' (3), and 'Sequence' (10). The 'Time management' section includes 'Match duration' (3 Min.), 'Setup/break time' (10 Min.), and 'Starting time' (7 : 47). The 'System' section has radio buttons for 'Flags' (selected) and 'Points', and a checkbox for 'Autoupdate time management'.

Ref.nr.	Nr.	Description	Hour	Minits	Field	Match duration	Setup time	Sequence	System
100000	10	Meisjes 6-7yr wit (Cat.1)	9	30	1	2	10	01	Flags
100001	15	Jongens 6-7yr wit - geel (Cat.1)	9	30	2	2	10	02	Flags
100002	20	Jongens 8-9yr wit - geel (Cat.2)	9	30	3	2	10	03	Flags
100003	21	Gemengd 8-9yr oranje(Cat.2)	7	49	1	3	10	04	Flags
100004	25	Meisjes 8-10yr wit - geel (Cat.2)	10	8	2	2	10	05	Flags
100005	30	Jongens 10-11yr wit - geel (Cat.3)	12	18	3	2	10	06	Flags
100006	35	Gemengd 10-13yr wit - geel (Cat.3 - 4)	8	29	1	2	10	07	Flags
100007	51	Gemengd 14-34yr wit - geel (Cat.5 - 7)	7	50	3	3	10	08	Flags
100008	31	Gemengd 10-13yr oranje - bruin (Cat.3 - 4)	9	58	2	3	10	09	Flags
100009	65	Gemengd 18-99yr wit - oranje (Cat.7 - 8)	7	47	3	3	10	10	Flags
100010	41K	Meisjes 13+jr 46+kg	8	6	3	3	10	11	Flags
100011	50	Gemengd 14-34yr oranje - zwart (Cat.5 - 7)	7	39	1	3	10	12	Flags
100012	66	Gemengd 18-99yr groen - zwart (Cat.7 - 8)	8	7	1	3	10	13	Flags
100013	21J	Judo 9+jr gemengd	8	34	3	3	10	14	Flags
100014	20J	Judo 9-jr gemengd	7	48	3	3	15	15	Flags
100015	40K	Jongens 8-9yr wit - oranje (Cat.1 - 2)	8	35	1	3	10	16	Flags

After creating the categories the match duration, setup time, sequence and field number must be entered.

For match duration and setup time you can use the following times:

Appendix: Average time table for Time management setup

Type	Match duration	Setup
Kata white-blue, separate execution (Flags)	2.5 min.	10 min.
Kata white-blue, simultaneous execution (Flags)	2 min.	10 min.
Kata blue+, separate execution (Flags)	3.5 min.	10 min.
Kata blue+, simultaneous execution (Flags)	2.5 min.	10 min.
Teamkata white-blue, separate execution (Flags)	2.5 min	10 min.
Teamkata blue+,separate execution (Flags)	3.5 min	10 min.
Kata white-blue separate execution (Points)	1.5 min	10 min.
Kate blue+ separate execution (Points)	2 min.	10 min.
Teamkata white-blue, separate execution (Points)	1.5 min.	10 min.
Teamkata blue+,separate execution (Points)	2 min.	10 min.
Kumite match 1.5 min.	3 min.	10 min.
Kumite match 2 min.	3.5 min.	10 min.
Kumite match 3 min.	5 min.	10 min.
Kumite match 4 min.	7 min.	10 min.

# Time management Setup

Only the starting time for the first category on each tatami has to be entered. The system will automatic calculate the following times.

At system you must enter, if you want to use the flags (schematics) or the point system for the selected category.

At sequence, you enter the number how you want the system to handle the sequence of the matches.

The match you want to be handled first gets 1 then next 2 etc. You do not have to look at the fields for entering this sequence.

Time management cannot handle empty categories, so make sure all categories have contenders added. When you have empty categories, time management will give some error messages during loading.

The screenshot shows the 'Time Management' software interface. It has three tabs: 'Data', 'Time board', and 'Graphic'. The 'Data' tab is active, displaying a table with the following columns: Nr., Description, Start ..., Field, Matc..., Setup..., Sequ..., Matc..., Cont..., Poule..., Calc e..., Live e..., % Rea..., and Type. The table contains 27 rows of data for various judo categories. Below the table are several control buttons and checkboxes: 'Correction' (Time correction), 'Use live time correction' (checked), 'Update category database' (checked), 'Update all', 'Auto update' (On, checked), 'External screen' (On screen, Close screen), 'Print', 'Export', 'Load', and 'Close'.

After filling all data for each category, you can open the time management screen. Click on the "load button".

Make sure "update category database is checked" (this can also be done in setup) The new calculated times will not be saved when this option is not checked.

Click "time correction" and all start times will be calculated. This can also be done with "update all".

Time correction will update only the times in the list. Update all will also update the graphic time board information and the external screen.

# Time management Setup

By clicking the time bar in the graphic display, you are able to change the field number. After changing the field number press “update all”, and the times will be updated. The place of the timebar in the overview is determined by the sequence number in the category setup. If you want them to move in time, just change the sequence number.

The screenshot shows the 'Time Management' software interface. The main window has three tabs: 'Data', 'Time board', and 'Graphic'. The 'Graphic' tab is active, displaying a grid of time bars for nine fields. The 'Starttime' is 09:30 and the 'Endtime' is 13:17. A vertical red line is positioned at 10:16. An 'Edit Category' dialog box is open in the foreground, showing the following details:

- Nr: 65 (with a secondary value of 100009)
- Description: Gemengd 18-99yr wit - oranje (Cat.7 - 8)
- Field: 3, Sequence: 10
- Time management: Match duration 3 Min., Setup/break time 10 Min., Starting time 11 : 26 (Hour : Min.)
- System:  Flags,  Points,  Autoupdate time management

At the bottom of the interface, there are several buttons: 'Time correction', 'Update all', 'On screen', 'Close screen', 'Print', 'Export', 'Load', and 'Close'. The 'Use live time correction' and 'Update category database' checkboxes are checked.

When “use live time correction” is checked, the system will calculate with the times it will receive from the match tables after each match. When “auto update” is checked, the screen will be automatic updated every 5 minutes. When you use more fields, this is only possible when you use a network data folder that is used for all fields to write the data. (network setup)
